

PML series

PERMANENT MAGNETIC LIFTER

The permanent magnetic lifter can be used in a variety of industries for the transportation and lifting of steel, engine parts, semi-manufactured goods and moulds. Due to its magnetic surface, it lifts goods.

FEATURES

The magnetic lifter's highest pulling force is 3.5 times greater than the rated lifting capability.

Light weight, ranging from 10-125kg.

Safe: NO electricity is needed to operate the magnetic lifter, once operated there is less than 1% residual magnetism.

The simple switch and safety button design allows for one-handed operation.

Larger sizes available, output up to 6000kg.

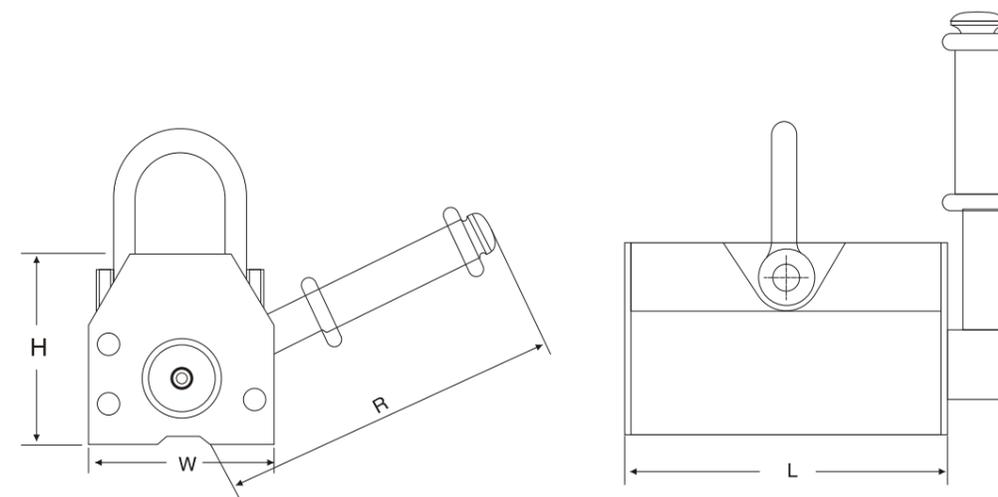

HOW TO DETERMINE THE RIGHT TYPE OR MAGNETIC LIFTER FOR YOUR APPLICATION

The capacity of the lifting magnet is determined by the thickness and surface quality of the component.

Before operation, it is necessary to find out the percentage or the steel thickness or the component and capacity curve.

If the component's surface roughness (Ra) is less than 6.3µm, the magnetic lifter surface gap will not exist, the lifter gap should be estimated.

PERMANENT MAGNETIC LIFTER

● 3.5 times safety factor

Model	Rated lifting strength	Cylindrical lifting strength	Max. pull-off strength	L	W	H	R	Operation temperature	Nte weight
	Kgf	Kgf	Kgf					°C	Kg
